

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0030] of the description as follows:

FIG. 1 shows a first embodiment of the invention, with sections 2, 2' and 2'' and corresponding connector devices 5. Connector devices 5 are connected to HF-generator 10. The surface shown here is the one facing the skin. The sections 2, 2' and 2'' are here placed on a carrier material 3, and a substance 4 containing a circulation-promoting agent has been applied to the electrically conductive sections 2, 2' and 2'' of the neutral electrode 1.
